c/o Chairman

Dear Mr. Chairman;

This is an letter asking for basic information on the nuclear power plants in America. First, I would like to know if something like "Three Mile Island" will ever happen again, if the problem at "Three Mile Island" has been fully repaired and could you send me an detailed map of other Nuclear Power Plants in America. I feel that the nuclear energy in this country is fairly safe, but the happening at "Three Mile Island" have rised many questions among my fellow class mate, this is way I ask you to send me information on nuclear power plants, if possilbe could you send me some type of booklet that you could send in numbers around 15, this type of booklet would be very helpul in my class search. Thank you very much for your time and help in this matter.

Sincerely yours,

*Brian Jackson*
