POOR ORIGINAL

Dear Mr. Chairman:

A physician in my district has been in touch with me regarding the Three Mile Island incident. He expressed concern about the safety and health hazards and asked some very good questions. I would be grateful for answers to the following questions:

1. How much I¹³¹ was released during the incident?
2. How many people were examined (for contamination) and what were the results?
3. How many cattle were examined and what were the results?
4. Was any of the milk which contained I¹³¹ distributed, and if so, where?
5. Will these issues be studied in more depth?
6. Will the incidence of cancer "downwind" and "upwind" of the plant be studied?

Thank you very much for your help.

Yours sincerely,

Millicent Fenwick
