

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

AUG 9 1979

MEMORANDUM FOR: E. G. Case, Deputy Director, Office of Nuclear Reactor Regulation

FROM: D. Eisenhut, Acting Director, Division of Operating Reactors

SUBJECT: RECOMMENDATIONS FOR FUTURE ACTIVITIES RELATED TO GENERIC TASK A-24

Per your request, we have reviewed the subject document (reference: Memo to H. Denton from S. Hanauer dated July 6, 1979).

As we have discussed, we understand that the change to Generic Task A-24 is essentially to postpone the review of the related topical reports consistent with the schedule for the "lead plants" reviews. We have no problem with this approach.

As further discussed with you, I believe that the development of DOR criteria for use in the review of the responses to Bulletin 79-01 should be compatible with DSS's interim position. As we agreed, DOR will be working closely with DSS to ensure this consistency.
