Daniel J. Donoghue  
Director, Office of Administration  
Nuclear Regulatory Commission

Dear Mr. Donoghue,

The enclosed is a copy of the letter which I sent to Mr. Hendrie to urge him to act with greater interest in the public good. As you are in a salient position to greater facilitate his steps toward this goal, request you to aid the implementation of safety features currently lacking in your public image.

For the future of our race, unencumbered by radiation poisoning, I ask you and thank you in your co-operation.

Sincerely,

*Gary Ciurczak*
