Kathy Griffin
2885 Naples Dr.
Winter Park, FL 32789

U.S. N.R.C.
Sec. of the Commission
Washington, D.C. 20555

Dear Secretary,
I support the new NRC rules for shipping spent nuclear fuel but I feel the rules should be amended in the following ways: should allow for public comment before a route can be approved by means of publication in the Federal Register; should require notification of each shipment to local authorities as well as the NRC; should include a provision for holding local public hearings prior to route approval, if requested by citizens or governments along the shipment route; should require the shipper to prepare and submit to the NRC for approval, emergency response plans for incidents

Acknowledged by card..... 8/21/79

7909250048 .

which may occur en route; should embargo all shipments of domestic spent fuel until they can be directly shipped to a demonstrated permanent and safe disposal site.

Sincerely concerned,

Kathy H. Griffin
