DOCKET NUMBER
PETITION RULE PRM-2-8(44FR 32489)

Marvin I. Lewis
6504 Bradford Terrace
Phila. PA 19149
8-8-79.

Secretary of the Commission
Sir:

In reference to the FR notice dated 6-6-79 ,Docket PRM 2 8,
I wish the following comments added to the record.

10 CFR Part 21 supposedly placed criminal penalties upon companies
purposely holding back safety related failure information.
Well it hasn't worked.

Davis Besse nuke had a stuck pressure relief valve about a year ago.
^ similar valve at TMI#2 stuck on 28 March 1979 contributing significantly
to the accident and damage at TMI#2.

The information on this stuck valve at Davis Besse was last in the
works for a year.

And nobody's been indicted .

Radiation released, a billion dollar nuke destroyed, evacuation,
and nobody has been indicted!!!!

^hat's my comment on 10CFR 21.

It is exactly what I predicted in my letter to Jane Axelrod's
boss after the meeting which I attended in King of Prussia
on Part 21.
