

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

August 30, 1979

Docket No. 50-309

LICENSEE: YANKEE ATOMIC ELECTRIC COMPANY (YAEC)  
FACILITY: MAINE YANKEE  
SUBJECT: PRELIMINARY MEETING ON RADIOLOGICAL EFFLUENT TECHNICAL SPECIFICATIONS  
(TS) FOR MAINE YANKEE

A preliminary meeting was held, August 17, 1979, between the NRC staff and representatives for the YAEC to discuss the proposed amendment for Radiological Effluent TS (RETS) modifying the Appendix A of the license, DPR-36. Enclosed is a list of the attendees.

The licensee had provided the proposed RETS on March 15, 1979. The staff reviewed the proposed RETS and provided a markup and comments at the meeting. Major comments included the need for a specification on the solid radwaste system, projected dose limits for the use of radwaste systems, contents of the Offsite Dose Calculation Manual and Process Control Program and changes that have been made in the model RETS NUREG-0472 (Rev. 2), July 1979. Edit comments were also recommended, in order to include all items contained in the model RETS in the licensee's Appendix A format.

The licensee will revise his proposed Radiological Effluent Technical Specifications and provide his Process Control Program on Solidification about September 20, 1979. At the same time, the Radiological Assessment Branch will write comments on the Offsite Dose Calculation Manual for Maine Yankee to be forwarded to the licensee within 30 days.

A handwritten signature in cursive script that reads "Chris Nelson".

Chris C. Nelson, Project Manager  
Operating Reactors Branch #4  
Division of Operating Reactors
