315 Pepper St., Harrisburg, Penna. 17102 (717) 233-7897

DOCKET NUMBER  
PROPOSED RULE

24a  
-140(44FR43128)

August 21, 1979

Secretary  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sirs:

In our haste to meet the August 22nd deadline for your Invitation #79-121, we sent you testimony which contains the statement (see page NRC Response 4):

"2) The potential for high dose exposure to the thyroid has existed for the past four and a half years, ... "

This statement should read: "four and a half months, ...".

We also realized that a photocopy was sent instead of an original copy. Enclosed you will find a corrected original copy of all the material that we sent you by express mail on August 20, 1979. We hope these oversights have not caused you inconvenience.

Thank you.

Sincerely,

*Lee B. Musselman*

Lee B. Musselman
