Mrs. Dana W. Hebert 1010 Mapie Street Plaquenine, Louisiana 70764

Dear Mr. and Mrs. Hobert:

appreciate having the benefit of your opinion.

I think it is very important that we do to talked the end of the cident at Thomas ile than industry too quickly as a result of the cident at Thomas ile than. This view is also shared by President parture to the Nation pointed out that nuclea the parture as part of the energy mix of our country. At this sine, we close produces 13% of our National Products are year.

Today, we are using seventy sight quadrillion but.

The year two thousand, the Department of Energy products

oe

using one hundred twenty-two quadrillion but's,

a dispurcase in energy need. With the unproduction oplies

countries and the dwindling supplies

it is virill portant that we develop new teer.

Dear Senator Johnston,

We are very concerned about the Waterford 3 and the Riverbend Nuclear Power Plants currently being built in Louisiana due to:

- unexplained problems causing the accident at the similarly constructed Three-Mile-Island plant;
- lack of a permanent disposal plan for radioactive wastes;
 - . 3. evacuation problems;
- 4. constant low level radiation emissions from normally operating nuclear power plants.

I ask you to work to halt construction on these plants until these issues are resolved.

Sincerely,

Mr. and Mrs. Dana W. Hebert
