POOR ORIGINAL

H. D. Thornburg, Chief, Field Support & Enforcement Branch, RO

METROPOLITAN EDISON COMPANY - RO INSPECTION REPORT NO. 50-289/74-32
(F14012H1)

We have reviewed the subject report and forwarding memo and provide the following comments regarding the requested action:

Item 1.

We would look ridiculous asking DL to require a licensee to upgrade his QA program submittal to reference a regulatory guide which the licensee is, in practice, implementing; especially when a relatively minor issue is involved.

Item 2.

We have discussed the matter with the appropriate DL personnel (Bernero and Jaffe). DL anticipates that their review will be completed within the next several months. At that time the 3MI technical specifications will be revised by DL, as appropriate.
