COMMUNICATIONS
MAIL SECTION

October 5, 1979

Mr. Charles E. MacDonald, Chief
Transportation Branch
Division of Fuel Cycle and Material
Safety
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. MacDonald:

This letter is in regard to the two NFS-4 spent fuel shipping casks and Certificate of Compliance No. 6698.

On April 6, 1979, the NRC issued an Order which suspended the general license for use of casks designated as Model No. NFS-4 and thereby prohibited the use of these casks until the conditions of the Order were met and a further Order issued to lift the suspension. As regards the two NFS-4 casks, this Order remains in effect.

It is NFS' intention that the NRC will be provided with the necessary information, to meet the requirements of the Order. Nuclear Assurance Corporation (NAC) has agreed to undertake for NFS such licensing action necessary to obtain NRC approval to allow utilization of the casks for shipment of spent nuclear fuel and other types of solid radioactive materials.

NFS hereby requests that the Certificate of Compliance No. 6698, which expires on November 30, 1979, be renewed for an additional five years with the understanding that until conditions of the April 6th Order are met, the usage of the two NFS-4 casks is prohibited. Pursuant to 10 CFR Part 170, a licensing fee of \$150.00 (Check No. 21432) is enclosed.

Sincerely,

James R. Clark, Manager
Quality Assurance & Licensing
