In reply refer to:  
AFA-SE

Mr. Ronald L. Ballard, Chief  
Environmental Project Branch 1  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Ballard:

This responds to your letter, dated September 14, 1979, requesting a list of endangered and threatened species and those proposed for listing in either category that may be present within the area of the proposed 2-unit Pebble Springs Nuclear Plant near Arlington, Oregon.

To the best of our knowledge, there are no listed or proposed threatened or endangered species within the area of the project. However, we are attaching a list of candidates which might within the foreseeable future be proposed and then undergo a final rulemaking. We urge that you consider informal consultation to avoid any conflicts at a later date should the species become listed and be present within the area of the proposal. Informal consultation should be requested of our Area Office at the following address:

L. A. Mehrhoff  
4620 Overland Road, Room 238  
Boise, Idaho 83705  
Phone: FTS 554-1960

This fulfills the requirements of the Fish and Wildlife Service to provide information on listed species pursuant to Section 7(c) of the Endangered Species Act of 1973, as amended.

Sincerely yours,

*Bill Meyer*  
William H. Meyer  
Acting Regional Director
