Docket No. 30-06309

Based on the results of an NRC inspection conducted on February 28, 1980, it appears that certain of your activities were not conducted in full compliance with NRC regulations as indicated below:

10 CFR 30.51(a) requires that each person who receives byproduct material keep records showing the receipt, transfer and disposal of such byproduct material.

Contrary to this requirement, as of the date of the inspection, you failed to keep records showing the receipt of radioactive samples.

This is a deficiency.
