

March 12, 1980

NOTE TO: R. Mattson

FROM: M. Ernst

SUBJECT: TASK ACTION PLANS, DRAFT 3

A quick review of Draft 3 indicates several areas that perhaps should be included in the final document.

1. There is an inadvertant omission on Page 14. Item IV.E.2 should be titled "Plan for Early Resolution of Safety Issues." Items 2-4 then should be renumbered to 3-5.
2. Dan Muller's recent memorandum to you transmitted Task Action Plan III.A.3 for inclusion in the final plan. It did not get to you in time for inclusion in Draft 3, but should subsequently be considered.
3. We had suggested to Frank Ingram an expansion of the public information item (III.C.1) to include the nonradiological impacts of accidents and the costs and benefits of protective actions. This expansion does not appear in the current version, but F. Ingram agrees that it should be included.
