Secretary of the Commission

U.S. Nuclear Regulatory Commission

Washington, D.C.

Dear Sir

This is in reply to your proposed admendment to Section 35.11 of 10 CFR Part 35. I think this is a very good admendment and support this change. Our institution is on a central radiopharmacy and we have very small quantities of radio-active materials on hand. We do no research and do not use any IND or NDA drugs. I feel a radiation safety committee could handle our needs quite adequately. I also feel this committee should only be required to meet twice a year. We honestly do not have enough to talk about at our present quarterly meetings.

Sincerely yours,

Michael S. Cunningham

Michael S. Cunningham, C.H.M.T.
