THREE MILE ISLAND NUCLEAR STATION UNIT 1

Application for
Class 10⁴B Utilization Facility Operating License

DOCKET NO. 50-289

POOR ORIGINAL

Applicant submits by this document, a request to amend the application for a construction permit filed on May 3, 1967, to reflect revised completion dates. The earliest completion date is now estimated to be September 30, 1972, and the latest completion date is estimated to be September 30, 1973.

The need to extend the aforementioned completion dates was necessitated by construction delays. A major contributor to these delays was an eleven week construction strike.
