NT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

During third quarter a contractor apparently received 3.070 rem (whole body). The majority of his exposure occurred during the U-1 refueling. Specifically for the two week film badge period ending 10/15/73, Commonwealth's film badge contractor credited this individual with 2.790 rem. In contrast, timekeeping and self reading dosimetry provided an estimate of 2.156 rem for the same two week period. No safety implications were involved and the health and safety of the individual was not affected.

USE DESCRIPTION AND CORRECTIVE ACTIONS (27)

Contractor was inadvertently permitted to accumulate too much exposure  
on one film badge. Also the film badge read 30% higher than the self  
readers. No explanation was found for this discrepancy. The administrative  
personnel were re-instructed on the necessity of timely film badge processing  
and a new procedure was implemented to ensure same.
