U.S. Nuclear Regulatory Commission
Office of Public Affairs
Washington, D.C.

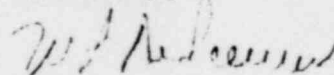

Dear Sirs:

This coming year, 1980, I will be using the topic of nuclear energy for a research report at High Point College. Students will be reading the novel The China Syndrome and will be researching various aspects of nuclear energy.

To provide them with background information I would appreciate any free brochures, pamphlets, and materials you might have. I would need 50 copies of each type of material. Also, if you have a catalogue of other materials for purchase, I would appreciate a list.

Thank you for your cooperation and help.

Sincerely,

Dr. William L. DeLeeuw
Assoc. Prof., English
