Docket No. 50-313, 50-368
License No. DPR-51, MPF-6
Revised ANO Emergency Plan
(File: 1510, 2-1510)

Gentlemen:

In response to Mr. D. G. Eisenhut's letter dated September 13, 1979, Mr. R. W. Reid's letter dated December 17, 1979, and commitments made in our meeting with the NRC Emergency Plan review team during the week of November 5, 1979, the following is provided.

Attached is a draft of the revised Arkansas Nuclear One Emergency Plan which incorporates the recommendations of NUREG-0578, NUREG-0610, Emergency Planning Review Guidelines Number One-Revision One-Emergency Planning Acceptance Criteria for Licensed Nuclear Power Plants, and Regulatory Guide 1.101. The plan is undergoing further review as implementing procedures are being developed to further detail the planning to assure a thorough and workable Emergency Plan.

We are soliciting comments from the state and local agencies at this time and will be addressing those comments as soon as they are available.

AP&L is placing very high priority on completing and implementing this new plan. Your comments will be extremely beneficial, and we request feedback as soon as possible.

1658 128

Incorporated in the attached plan is the revised State of Arkansas Emergency Operations Plan, Annex Q, Radiological Incident Response. This revision has been developed since our meetings with the NRC Review Team in November. The State of Arkansas has solicited comments from the public and is now in the process of addressing those comments.

Very truly yours,

David C. Trimble
Manager, Licensing
