UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

DECEMBER 11, 1979

Docket Nos. 50-298  
and 50-285

LICENSEES: Nebraska Public Power District  
Omaha Public Power District

FACILITIES: Cooper Nuclear Station  
Fort Calhoun Station, Unit 1

SUBJECT: SUMMARY OF COOPER AND FORT CALHOUN EMERGENCY PLANNING MEETINGS  
ON NOVEMBER 27, 1979 AND NOVEMBER 29, 1979

Meetings to discuss emergency planning were conducted at the Cooper Nuclear Station Security Building from 3 to 5 P.M. on November 27, 1979, and at Legislative Chamber No. 3 in the Omaha Douglas Civic Center in Omaha, Nebraska from 9:30 A.M. to 5 P.M. on November 29, 1979.

In both meetings, J. Martin presented a point by point discussion of emergency plan elements required by Appendix E and Preparedness objectives, as outlined in enclosures 1 and 2. Public comments were received in both the November 26 and 29 meetings. There was extensive clarifying discussion regarding new emergency planning requirements between utilities, state and local agencies, and emergency planning team members in the November 29 meeting.

Public comments could, for the most part, be grouped into concerns related to notification methods, EPZ evacuation distance (most of Omaha is just beyond 10 miles), and compensation for damages.

Agency and licensee comments could, for the most part, be grouped into concerns related to funding, difficulty in meeting schedules, need for integration between emergency planning requirements and other requirements, and need for closer communication between NRC, state/local agencies, and utilities in proceeding with planning.

Attendance lists for both meetings are enclosed.

A handwritten signature in dark ink, appearing to read "V. Rooney".

Vernon L. Rooney, Project Manager  
Operating Reactors Branch #3  
Division of Operating Reactors

## PREPAREDNESS OBJECTIVES

- (1) Effective coordination of emergency activities among all organizations having a response role.
- (2) Early warning and clear instructions to the population-at-risk in the event of a serious radiological emergency.
- (3) Continued assessment of actual or potential consequences both onsite and offsite.
- (4) Effective implementation of emergency measures in the environs.
- (5) Continued maintenance of an adequate state of emergency preparedness.

1665 336

## EMERGENCY PLAN ELEMENTS REQUIRED BY 10 CFR PART 50, APPENDIX E

- Emergency Organization
- Accident Assessment Measures
- Notification Criteria for Local, State and Federal Agencies
- Agreements with Local, State and Federal Agencies
- Criteria for Protective Measures
- Maintenance of Emergency Preparedness
- Medical and Hospital Arrangements
- Emergency Personnel Training
- Testing by Drills
- Reentry Criteria
- \* ONRR/Division of Reactor Licensing Reviews and Approves Plans.  
OI&E Audits Procedures.
- \*\*NRC Exercises No Authority over States or Other Federal Agencies.
