### 2. Meeting

The meeting was initiated by PSI to present their planned and in-process corrective actions in response to the nine issues identified in the NRC "Order Confirming Suspension of Construction", dated August 15, 1979.

As a result of these discussions, NRC representatives concluded that the type and scope of the planned and in-process corrective actions appear appropriate. It was mutually understood by both the licensee and NRC that considerable corrective action remains to be completed prior to detailed evaluation of the licensee's actions by NRC.

Further meetings with NRC to discuss the licensee's progress regarding the establishment of the required corrective actions are planned.
