Director of Nuclear Reactor Regulation  
Attention: Mr. Robert N. Reid, Chief  
Operating Reactors Branch No. 4  
Division of Operating Reactors  
United States Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Reid:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specification, Appendix A, be revised to reflect the change attached. This proposed change allows a delay in the testing of the reactor vessel internal vent valves.

This amendment request involves a single change of the Class III type. It is therefore determined to be a Class III amendment. Enclosed is \$4,000.00 as required by 10CFR170.

The attachment identifies the proposed change, its safety evaluation and schedule required to implement the change after NRC approval.

Very truly yours,

RPC:FRM:cts
