Mr. Joseph M. Hendrie, Chairman
 United States Nuclear Regulatory Commission
 1717 H Street, N. W.
 Washington, D. C. 20555

Dear Mr. Hendrie:

I am writing to ask you to reconsider the NRC's decision to delay the licensing of Veeco's North Anna 11 nuclear power unit in Virginia.

This delay will place an economic hardship upon consumers in Virginia as well as consumers who also utilize Veeco's energy in northeast North Carolina.

Thanking you for your time and interest in this urgent matter.

Sincerely,

J. J. "Monk" Harrington

Joseph M. Hendrie, Chairman
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

In the Matter of Virginia Electric and Power Company
North Anna Power Station, Unit 2
Docket No. 50-339

Dear Chairman Hendrie:

Recently the Nuclear Regulatory Commission imposed a moratorium on the licensing of nuclear power plants until new rules could be written for operating reactors. I am writing to you on behalf of Citizens for Environmental Values to state that the members of our organization, who live in the greater Richmond, Virginia area, feel that the NRC made the correct decision in imposing a moratorium. The accident earlier this year at the Three Mile Island plant in Pennsylvania clearly showed the need for a change in policy.

In recent weeks Governor Dalton and other irresponsible Virginia officials have been trying to undermine the moratorium. They want North Anna Unit 2 licensed as soon as possible because they are worried about the financial implications of a licensing delay. What Governor Dalton and his allies have ignored are the much greater consequences, both human and financial, of a possible catastrophic nuclear accident.

Our organization strongly urges the NRC to continue the moratorium. The safety of Virginia's people depends on your willingness to stand up for a wise policy.

Sincerely,

Jon Sundholm
