Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Denton:

In the Matter of the) Docket Nos. 50-259
Tennessee Valley Authority) 50-260
50-296

Enclosed are 40 copies of a supplement to the requested amendment to licenses DPR-33, DPR-52, and DPR-68 to change the technical specifications for Browns Ferry Nuclear Plant units 1, 2, and 3 submitted by letter from J. E. Gilleland to you dated June 29, 1979 (TVA BFNP TS 123). The additional requested technical specification changes (Enclosure 1) were inadvertently omitted from the above amendment request. Justification for this additional change is also included (Enclosure 2). The justification also provides a response to the letter from T. A. Ippolito to H. G. Parris dated October 25, 1979.

Because this requested change to the technical specifications is a minor addition to a previously requested amendment for which appropriate licensing review fees were provided, no additional fees will be forwarded.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
