Docket No. 50-245
Reportable Occurrence RO-78-20/1P

Dear Mr. Grier:

This letter is forwarded to provide prompt notification of Reportable Occurrence RO-78-20/1P as required by the Millstone Unit 1 Technical Specifications.

On October 10, 1978, at 0920 hours, during normal plant operation, it was discovered that the unused chloride capacity of one of the full flow on line demineralizers was less than the 30 pound minimum prescribed in Technical Specification 3.6.J.1. Unit power was immediately reduced and the demineralizer was removed from service. Results of the investigation into the incident and further analysis will be included in the follow up 14 day report.

Yours truly,

J. F. Opeka
Station Superintendent
Millstone Nuclear Power Station
