Dear People,

DOCKET NUMBER
EXPORT IMPORT 11000495

I understand that the N.R.C. is soon to come to a decision about whether to approve shipping of the Westinghouse reactor intended for use in the Philippines.

I understand that the ~~proposed~~ intended destination of this reactor is nine miles from an active volcano, as well as being in an area quite prone to earthquakes and tidal waves.

I understand that there are many cruel and corrupt circumstances surround the whole issue of this particular plant.

I urge you to decide to do all in your power to stop this madness regardless of the financial agony it may inflict on Westinghouse or other illustrious firms.

In the event you allow the reactor to be shipped, I humbly request an explanation of

7906220 224 G

precisely what factors influenced you
to come to such a decision.

If you disallow it, I commend
you on your sanity, integrity, and
responsibility.

Thank you.

Sincerely,

Dexter Ahr
