Director of Nuclear Reactor Regula
Attn: R. W. Reid, Chief
Operating Reactors Branch No. Al
U.S. Nuclear Regulatory Commission

Washington, D.C. 20555

Dear Sir:

THREE MILE ISLAND NUCLEAR STATION, UNIT 1 (TMI-1)
DOCKET NO. 50-289

OPERATING LICENSE NO. DPR-50
TECHNICAL SPECIFICATION CHANGE REQUEST NO. 22, AMENDMENT NO. 1

Enclosed are three signed originals (thirty-seven conformed copies sent separately) of Technical Specification Change Request No. 22, Amendment 1, requesting amendment to Appendix A of Operating License No. DPR-50. As a part of this request, proposed replacement pages for Appendix A are enclosed.

Also enclosed is one signed copy of Certificate of Service for proposed Technical Specification Change Request No. 22, Amendment 1, to the chief executives of the township and county in which the facility is located.

This amendment serves to modify our previous Change Request No. 22 dated October 29, 1975.

It is our understanding that our previous Appendix J related request (October 29, 1975) has not been approved in that the NRC is considering revising Appendix J. We request that as a minimum, the Fluid Block aspect of our request (addressed by this amendment) be approved prior to completing your generic review of Appendix J and since approval of this aspect is urgently needed, we request approval prior to April 30, 1976.

Sincerely.

Wice President

1479 187
