Docket No. 50-289

Gentlemen:

This refers to the inspection conducted by Mr. B. K. McLeod of this office on August 2, 3, 4 and 28, 1972 of construction activities authorized by AEC Construction Permit No. CPPR-40 and to the discussions of our findings held by Mr. McLeod with Messrs. Wise, Barton and Toole of your staff at the conclusion of the inspection.

Areas examined during this inspection included the preoperational testing program, station operating procedures, quality assurance, and post erection cleaning. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with plant personnel, and observations by our inspector.

No items of nonconformance were identified in the areas examined; however, we understand, based on discussions with your staff at the conclusion of our inspection, that the following actions or activities are being accomplished:

The preoperational test procedures which were prepared prior to the time General Public Utilities Service Corporation assumed responsibility for the technical content of the Three Mile Island 1 test program, will be revised to conform to the format and procedure content required by the Three Mile Island 1 Test Manual. The review and approval process will also be as defined in the Three Mile Island 1 Test Manual.

7910290 720

No reply to this letter is necessary; however, should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely yours,

James P. O'Reilly
Director
