NRC PUBLIC DOCUMENT ROOM

DOCKET NUMBER
PROD. & UTIL. FAC. 50-289

Sec. of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Docketing and Service Section

The following is a written limited appearance statement in opposition in the matter of Metropolitan Edison Company (Three Mile Island Nuclear Station, Unit No. 1) Docket No. 50-289 (Restart.)

I vehemently oppose the reopening of T.M.I. nuclear power station.

The very fact that nuclear power plants were put into use as a safe, clean, economical way to produce electricity, before all the problems associated with them were safely and completely solved, is inconceivable showing the impatience, greed, and out-right stupidity of those responsible.

I could go on and on and on about the mistakes of both Med. Ed. and the N.R.C. but these facts are well known by everyone. Instead I would like to state that I have learned four important facts about nuclear power since the T.M.I. accident and these four facts are all

(over)

I need to know :-

Fact #I - The irreversible danger to human lives associated with mining uranium.

Fact #II - The total insanity of anyone to argue that a nuclear accident, as close as Fernley there to T.M.I. accident

Fact #III - After experimenting with nuclear power for 30 yrs. we have not found a safe method of disposing of the waste created by this power.

Fact #IV - The unforgivable practice of dumping so called "decontaminated" water into our drinking water and the venting of radioactive gases into our atmosphere, on a regular basis, under normal operating conditions, is totally unacceptable and shows total insensitivity on the part of those responsible

Until these problems can be corrected & fool nuclear power plants should be put back in controlled limitations, and look to the drawing boards.

I sincerely hope and pray that the U.S. will come up with the only humane decision, to close T.M.I. down.

The people of South Central Penna. have had enough!

Sincerely,
(Mrs) Ruth S. Hilbert.
