**Subject:** Additional Information Request for The Dow Chemical Company, NRC Lic. No. 21-00265-06, CN612637

Dear Ms. Wegener-Gave:

This message is in response to two letters submitted by you concerning sealed sources dispositioned from the radioactive materials license for The Dow Chemical Company, under NRC License No. 21-00265-06. Your letters, dated June 3, 2019, and August 7, 2019, will be made publicly available at the NRC's public document room and its Agencywide Document and Management System (ADAMS), respectively, under Accession Nos. ML19169A195 and ML19224C092.

Upon review of the submitted information, we were unable to determine whether the request includes any changes to the referenced license. Accordingly, our agency does not plan to amend the referenced license, at this time. This determination will also be communicated to you via formal letter, upon completion of our review.

If you had intended that the letters initiate an amendment to the referenced license, please clarify the changes requested, via signed and dated letter. You may submit the letter by fax, as a pdf file attached to an email, or by physical mail. In the alternative, if you could send a written confirmation that no amendment to the license is requested, at this time, it is appreciated. Please send any response to this message by Friday, September 13, 2019. Do not hesitate to call or email me with any questions you may have.

Sincerely,

Sara A. Forster, Health Physicist Licensing Reviewer
