JAN 22 1979

Mr. A. W. Snyder
Sandia Laboratories
P. O. Box 5800
Albuquerque, New Mexico 87115

Dear Mr. Snyder:

Re: FY 1979 Mid-Year Review

The mid-year review of the programs sponsored at your laboratory by the Office of Water Reactor Safety Research has been scheduled for February 23, 26 and 27 1979. Conference Room 1133 in our Silver Spring, Maryland office has been reserved for this purpose.

A suggested agenda is enclosed. Program presentations should cover accomplishments during the first half of FY 1979, plans for expected results during the remainder of FY 1979, and projections for FY 1980. Presentations should also include a summary of expenditures in FY 1979 to date and cost estimates for the remainder of FY 1979. Emphasis, however, is to be placed on technical review of results achieved and planned in FY 1979.

Your comments and recommendations on the above will be welcomed. Should you have any questions or require clarification, please contact Mr. Carl Johnson, (301) 427-4254.

Sincerely,

Original Signed by
T. E. Murley

Thomas E. Murley, Director
Division of Reactor Safety Research
Office of Nuclear Regulatory Research

Enclosure: As stated

SANDIA FY 1979 MID-YEAR REVIEW

WATER REACTOR SAFETY RESEARCH

Room 1133

February 23, 1979

9:00 am	Fire Protection Research (A1010)
1:00 pm	Qualification Testing Evaluation (1051)

February 26, 1979

8:30 am	UHI RELAP Model Development (A1207)
9:30 am	Statistical Analysis (A1205)
11:30 am	Two Phase Jets (A1216)
1:00 pm	Steam Explosion Phenomena (A1030)
3:00 pm	Molten Core Interactions (A1019)

February 27, 1979

9:00 am	Neutron Generator for Two-Phase Flow Calibration (A1211)
