Safeguards Branch

Inspection Summary

Inspection on February 5-9, 1979 (Report No. 50-266/79-02; 50-301/79-01)

Areas Inspected: Routine, unannounced physical protection inspection regarding: (a) action taken to correct previous inspection findings; (b) applicable procedural aspects of 10 CFR 73.55 which became effective May 25, 1977; (c) the approved security plan, submitted and approved in accordance with 10 CFR 50.34(c) and required implementing procedures; (d) installation activities relative to full implementation of 10 CFR 73.55; and (e) action taken relative to IE Circular 78-17. Specifically, the inspectors reviewed areas relative to security organization, access controls, physical barriers, response requirements, testing and maintenance of security equipment, communications controls and record requirements (10 CFR 73.70). The inspection involved 74 inspector hours onsite by two inspectors.

Results: Of the seven areas specifically inspected, two apparent items of noncompliance were identified in two areas (Security organization - Paragraph 3; Access controls - Paragraph 4) Both items are considered infractions. (Note: One item, access controls, was corrected prior to the conclusion of the inspection.) The previous inspection findings were corrected and are considered closed.
