Director
Directorate of Licensing
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Sir:

Operating License DPR-50
Docket No. 50-289
Nonroutine 10-Day Report 74-01

This letter and the attached enclosure are submitted to you as Nonroutine 10-Day Report 74-01 pursuant to Three Mile Island Unit 1 Technical Specifications (TMI-1 T. S.) section 6.7.2.a.2. It provides the information required by TMI-1 T. S. section 6.7.2 for three incidents which occurred at our Three Mile Island Nuclear Generating Station, Unit 1 (TMI-1), on September 5, 6, and , 1974, that involved the unplanned release of radioactivity from the Miscellaneous Waste Evaporator Feed Tank and associated piping.

It should be noted that we informed the Directorate of Regulatory Operations Region 1 Office of the above incidents on September 6 and 9; and at that time we classed the incidents as reportable under section 6.7.2.b.2 (30-day report). Subsequent review of the incidents in question, however, has resulted in our deciding that it would have been more appropriate for the additional information to have been submitted as a Nonroutine 10-Day Report in accordance with TMI-1 T. S. Section 6.7.2.a.2.

We, of course, recognize the importance of being able to rapidly determine the most appropriate type of report that should be initiated in response

to various types of incidents; and more specific guidance will be provided in this subject area by our issuing an appropriate memo. I have directed this action to be taken, and it is anticipated that it will be completed by November 1, 1974.

Sincerely,

R. C. Arnold
Vice President

RCA:DNG:sh

Enclosure--Information on three incidents at TMI-1
