Dear Sir:

Three Mile Island Nuclear Station Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289

In response to your letter of May 15, 1975 and our letters of M. v 31, 1975 and June 13, 1975 please be advised that the information that you requested regarding the possibility of "water hammer" occurrence in the TMI-1 feed system piping has been compiled. However, our consultant did not provide us with a completed copy of the report in sufficient time for our review prior to submittal, consequently a complete submittal will be delayed until September 10, 1975.

Please note that it has been determined that the subject water hammers can not occur with the piping layout, piping design and procedures utilized at TMI-1.

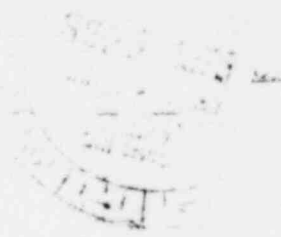

Should you have any questions regarding the above or regarding our September 10, 1975 submittal please contact me.

Sincerely,

*R. C. Arnold*  
R. C. Arnold  
Vice President
