SECRETARY OF THE COMMISSION,
U.S. NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

Attention: Docketing and Service Research

Dear Sir or Sirs:

I am requesting permission to make a limited appearance regarding a public hearing on an application by Public Service Electric and Gas Company to expand spent fuel storage at their Salem 1 nuclear generating station located in Lower Alloway's Creek Township.

The concerns of our listeners regarding a solution to the nuclear waste problem is the basis on which this request is made. Your consideration will be appreciated.

Sincerely,

John Prince, General Manager
