DOCKET NUMBER
PROPOSED RULE PR - Misc. Notice
Reg. Guide

R.P. Grill
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Grill,

I am writing to you to request an extended comment period on the NRC's regulatory guide on the "Preparation of Environmental Reports for Uranium Mills". I only recently received the guide from the Nuclear Information and Resource Service and have been away from the office for most of the time since receiving the document.

As you are quite aware, the development of uranium in the state of Wyoming is increasing and with it the increased impact upon the environment, both natural and social. The people of the state are growing more aware of the change and more concerned about it. In response to the increased concern, the Wyoming Outdoor Council has undertaken a project to develop information packets, workshops, and community information committees. As part of the process of information exchange and development, commenting and becoming well versed in the federal reports and activities has grown to be very important.

I hope that you will accept my comments into your review process. They will be to you early next week.

Thank you for your help.

Sincerely,

Debra East
Field Representative - Lander
Wyoming Outdoor Council

Acknowledged by card. 12/28 Yours
