Michael Lewandowski, Manager  
Corporate Radiation Safety Officer  
3M Company  
Corporate Radiation Protection & Compliance  
3M Center, Building 224-6W-28  
P.O. Box 33283  
St. Paul, MN 55133-3283

Dear Mr. Lewandowski:

Enclosed is Amendment No. 54 to your NRC Material License No. 22-00057-61 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

This amendment corrects your mailing address Post Office Box number and removes Lindsay Wollman as an Alternate Radiation Safety Officer (Alt. RSO).

We were unable to approve the requests concerning changes in the calculation of Small Quantity Volume of flammable materials, as detailed in your letter dated June 19, 2019.

In order for us to better and more completely understand your requests and determine what specific additional information is required, please contact me via email at [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov) to arrange a mutually convenient date and time for a telephone call to discuss this matter.

We already have several questions but may lack the full background and context to develop more meaningful requests for additional information. So a telephone call would be most helpful and scheduling one via email should prevent delays introduced if preliminary telephone calls are missed.

My colleague, Frank Tran, is assisting me in this review and he will need to be included in the telephone call discussion. Making arrangements for the call via email will facilitate Mr. Tran's involvement more readily also.

But please contact me, Colleen Carol Casey, and only me, as the responsible reviewer for this licensing action. I remain the lead licensing reviewer for this license.

Your understanding and cooperation in this matter is greatly appreciated. We look forward to hearing from you very soon.

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

M. Lewandowski

If you have any questions concerning this amendment or the requested information please contact me at (630) 829-9841. My fax number is (630) 515-1078. My email address is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov).

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".

Colleen Carol Casey
