Mr. Joseph Hendrie, Chairman
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Hendrie,

Many of our students and faculty are very much concerned about the Wolf Creek Project, the proposed nuclear plant. We were gratified that your commission has uncovered by careful inspection the faulty construction in the cement base and walls. We realize that you act with courage and integrity and offer our support.

Please revoke the license to continue building the plant until all defects have been corrected by appropriate rebuilding or discontinue the project altogether. In compliance with your regulations there must be a halt to the project as it has developed.

Of course, you may use your influence in this issue to spend the tax money in developing more positive energy sources, such as solar and wind power. The science students on this campus have considered the energy crisis seriously and would applaud this move.

Sincerely Yours,

Mary O' Burke

(Sr.) Mary O' Burke, Ph.D.
Professor of Chemistry
