SNM-1067, Amendment No. 18

Combustion Engineering
ATTN: Mr. H. V. Lichtenberger
Vice President-Nuclear Fuel
Nuclear Power Systems-Manufacturing
1000 Prospect Hill Road
Windsor, Connecticut 06095

Gentlemen:

In accordance with your application dated September 11, 1978, and its supplements dated November 3, 1978 and December 22, 1978 and pursuant to Title 10, Code of Federal Regulations, Part 70, Special Nuclear Material License No. SNM-1067 is hereby amended to authorize the addition of an exhaust system to the Annex of Building 17 for the Recycle Powder Area and to establish a corrective action level for the control of the gaseous effluents from the Windsor Facility.

This amendment is authorized subject to the following condition:

Condition 25. Corrective action will be taken whenever the total gaseous release rate from the Windsor Facility exceeds 2 μ Ci/week.

All other conditions of the license shall remain the same.

Condition 25 was discussed and agreed to by your Mr. George Bakevich and Mr. Norman Ketzlach of my staff on January 17, 1979.

FOR THE NUCLEAR REGULATORY COMMISSION

William T. Crow, Section Leader
Uranium Fuel Fabrication Section
Division of Fuel Cycle and
Material Safety
