Mr. Boyce H. Grier, Director  
Office of Inspection and Enforcement  
United States Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, Pennsylvania 19406

Dear Mr. Grier:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
IE Bulletin No. 78-14

The purpose of this letter is to inform you that we have changed our plan for replacing the Buna-N material in the hydraulic control units of the control rod drive system at the Oyster Creek Station. My letter of February 2, 1979 on the subject stated that we would schedule the replacement of the Buna-N material in all valves, except those in which the material had recently been replaced, during the next three years. Because of a recommendation made by the General Electric Company in a letter dated February 7, 1979, we have decided to complete the change out of the Buna-N material in the hydraulic control units during the next scheduled refueling/maintenance outage.

Very truly yours,

  
Donald A. Ross, Manager  
Generating Stations-Nuclear
