MEMORANDUM FOR: A. Schwencer, Chief, Operating Reactors Branch #1
FROM: D. Wigginton, Project Manager, Operating Reactors Branch #1
SUBJECT: CONFERENCE CALL TO STONE AND WEBSTER AND DUQUESNE LIGHT COMPANY - BEAVER VALLEY STRESS CALCULATIONS

On March 1, 1979, Steve Hosford and I placed a conference call to Stone and Webster and Duquesne Light Company to request a computer code printout to assist Engineering Branch in the review of the pipe stress issue identified by I&E (Jordan's memo to Vollmer dated February 23, 1979). The particular code was PIPESTRESS. We talked to Lynch and Carey of DLC and Harper, Morizarta, Cuniskey, Moran and Healy of S&W. Our position was that we were willing to go through the code to satisfy ourselves of the difference between PIPESTRESS and NUPIPE. We requested S&W to send in a set of the computer codes.

We were informed that this could not be done without corporate approval since it was S&W policy not to release codes or calculational methods to anyone. S&W indicated that we could come to Boston and look at the codes but could not take them away from Boston. We asked if S&W could bring the code to Bethesda and SW indicated that it might be possible.

Steve Hosford and I ended the conference call and then held discussions with Vince Noonan and M. Grotenhuis separately to decide on an acceptable arrangement. We decided to schedule a meeting as soon as was reasonable but no longer than a week away. I then telephoned DLC (Jack Carey) and set the date for March 8th which would allow a carryover day on the 9th if needed. We did indicate that it was necessary for S&W to bring the code calculations so that we could review any part we felt necessary.

In a subsequent telecon from DLC, March 8th was set for the meeting.
