Mr. G. Fiorelli, Chief  
Reactor Construction and  
Engineering Support Branch  
U.S. Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, Illinois 60137

Dear Mr. Fiorelli:

Subject: 10CFR50.55(e) Deficiency Report on Variation  
In Properties of Class 1E Cable Jacketing

Reference: Letter, EF2-41,417 of March 22, 1978,  
Edward Hines to James G. Keppler

The purpose of this letter is to provide a record of the telephone conversation held between Mr. R. W. Barr of Detroit Edison and Mr. H. S. Phillips of your organization on April 19, 1978. In that telephone conversation, the Nuclear Regulatory Commission was notified that the variation in insulation thickness on 1E cable jacketing had been determined to be non-reportable per 10CFR50.55(e). This item had been previously reported to your organization as a reportable item on February 27, 1978.

This letter complies with the request of Mr. H. S. Phillips of your organization to provide a written record of the determination of non-reportability, since a written interim report on this problem was submitted.

Sincerely yours,

W. J. Fahrner  
Project Manager  
Enrico Fermi Unit 2

RWB/lm

cc: Mr. John G. Davis, Acting Director  
Office of Inspection and Enforcement  
Division of Reactor Inspection Programs
