

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

APR 6 1979

DOCKET NO.: 70-820

APPLICANT: United Nuclear Corporation (UNC)

FACILITY: Fuel Recovery Operation
Wood River Junction, Rhode Island

SUBJECT: MARCH 21, 1979 MEETING WITH UNC
REPRESENTATIVE

Purpose

To discuss UNC's proposed emergency plan dated February 1, 1979, for the Wood River Junction site.

Place and Date

NRC office in Silver Spring, Maryland, March 21, 1979.

Attendees

NRC - R. L. Stevenson

UNC - D. M. Schultz, Manager, Compliance Fuel Recovery Operation

Discussion

Following its receipt on February 7, 1979, the proposed emergency plan for the Wood River Junction site was reviewed against the requirements of Appendix E, Part 50, and shortcomings identified. The shortcomings were augmented by comments on the UNC plan received informally from Mr. Dale Donaldson of Region I Office of Inspection and Enforcement in a telecon on March 7, 1979. The proposed emergency plan follows the general format of Regulatory Guide 3.42, "Emergency Planning for Fuel Cycle Facilities and Plants Licensed Under 10 CFR Parts 50 and 70". The consolidated comments and questions, on Sections 1, 3, 5, 7, 8, and 9 and the appendices, arising from our review were discussed with Mr. Schultz. One of the outstanding deficiencies of the plan was the fact that the agreements with outside agencies are all more than two years old.

7906250046

Mr. Schultz has begun rewriting the plan and expects to submit the revised plan and updated agreements to address our comments by May 6, 1979.
