Mr. Bud Requa
Nuclear Regulatory Commission
Maine Yankee Project Manager
Washington, D.C. 20555

Dear Mr. Requa:

In early June 1980, I wrote individual letters to several generic safety issue task managers requesting information on a number of generic issues that might relate to the Maine Yankee plant.

On 24 June 1980, I received a phone call from Chris Nelson. He stated my letters had been received and that the responses from the various task managers would be consolidated in a single response. So far I have not received a response.

I am a member of Governor Brennan's ad hoc Nuclear Safety Advisory Committee and I would like an answer to the following questions:

1. What generic safety issues are applicable to Maine Yankee?

2. What is the estimated date that each safety issue might be resolved by completion of any modifications at the Maine Yankee plant?

3. What is the rough estimate of the cost of each modification?

The Committee expects to meet again on 15 August. Any initial response you can provide prior to that date will be deeply appreciated. I would also appreciate it if you would provide a complete response by early September 1980.

Yours truly,

E. G. Garrett
