7 June 1980

Mr. Richard Johnson
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Johnson:

Please provide me information on the current status of Task A-11 ✓ (Reactor Vessel Materials Toughness). It is my understanding that you are the Task Manager.

I would also appreciate knowing if the problem has been completely resolved at the Maine Yankee plant.

Yours truly,

E.G. Garrett
