SEP 10 1973

Docket No. 50-29

Yankee Atomic Electric Company
ATTN: L. E. Minnick, President
20 Turnpike Road
Westboro, Massachusetts 01581

Gentlemen:

Your letter dated Jun[illegible] 1973, transmitted the proprietary version of a report entitled "Response to Request for Additional Information Dated June 1, 1973" and requested that this report be withheld in its entirety from public disclosure pursuant to 10 CFR Part 2, Section 2.790(b). In our letter dated July 11, 1973, we informed you that we could not act on your request for withholding the proprietary report until we had received from you the non-proprietary version of the report. Yankee's subsequent letter dated August 22, 1973, transmitted the non-proprietary version of the report.

The reason for withholding was stated to be that it contains certain information that would enable a reload fuel supplier in competition with Gulf United Nuclear Fuels Corporation to assess current Gulf United design and manufacturing methods and calculational results and to examine test results performed by Gulf United at their own expense. Disclosure of this information would result in competitive and economic disadvantage to Gulf United. The regulatory staff has examined the proprietary version of the report and pursuant to Section 2.790(b) of 10 CFR Part 2 concurs in this assessment.

Accordingly, we have approved your request and pursuant to Section 2.790(b) in 10 CFR Part 2 are withholding this proprietary report from public inspection. Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the document.

Sincerely,

Original signed by
Donald J. Skovholt
