Docket No. 50-289

J. Whittemore, Chief, Safeguards Program Branch, IE

PHYSICAL SECURITY INSPECTION OF THREE MILE ISLAND NUCLEAR STATION

A physical security inspection was conducted at the Three Mile Island facility on March 23-25, 1976 and the results were reported in IE Inspection Report No. 50-289/76-08. Several weaknesses and vulnerabilities were noted and are listed on pages 2 and 3 of the report. We believe that items on that list should not be classified as a weakness since the approved Security Plan explicitly provides for such matters.
