Comm Correspondence

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

CHAIRMAN

January 15, 1979

Honorable Charles Warren
Chairman
Council on Environmental Quality
Executive Office of the President
722 Jackson Place, N. W.
Washington, D. C. 20006

Dear Charles:

Thanks for your memorandum of December 22nd outlining how the new NEPA regulations can provide a framework for much of the energy facility siting coordination that was discussed at the Energy Coordinating Committee meeting. I think the memorandum is a most useful contribution to that discussion.

I appreciate your offer to help with questions we may have on the regulations. I expect there will be assorted matters we will want to discuss with the Council as we get down to evaluating the details of the process discussed in the memorandum, as well as the regulation's impact on our NEPA responsibilities.

Best wishes for the New Year.

Sincerely,

Joseph M. Hendrie
