This amendment includes an updated version of the Nuclear Projects Quality Assurance Program for Operations, including Revisions 3 and 4 which have not been previously transmitted to you. These revisions incorporated organizational changes, a redefinition of the scope of responsibility to include all NRC-regulated activities, and changes to improve the description of responsibilities and reflect current commitments to standards and regulatory guides.

Also included as part of this amendment are Figures 8.3-31 and 8.3-44. In Amendment 32 the wrong conduit and tray plan area was included as Figure 8.3-31 and an interim drawing not reflecting as-built conditions was included as Figure 8.3-44. The correct drawings are included in Amendment 33.
