Dear Sir:

Regarding your request of November 27, for a response to IE Bulletin No. 79-19, I hereby inform you that our uses of radioactive materials do not generate any significant amounts of low-level radioactive wastes that require packaging, transport and burial.

Additionally under item 9:

1. No low-level radioactive waste shipments were made in 1978 or the first six months of 1979.
2. No quantities of radioactive waste were shipped.
3. No liquid low-level radioactive wastes were generated.

I trust this will satisfy our requirement to respond to the above mentioned bulletin.

Yours truly,

Lester G. Bruns, Ph.D.
